

GSI provides professional services to support the Department of Defense (DoD) as well as federal and civil customers worldwide. Our team of managers and analysts apply their vast knowledge and skills to enhance the understanding of, and develop alternative solutions to complex issues; support and improve the operation of organizations; and provide outside points of view, advice and assistance for a broad area of interests including environmental restoration and compliance, resource conservation and climate change, environmental sustainability, strategic planning, asset management, logistical support and analysis, and financial analysis. We have a full suite of technical staff in nine offices across the Continental United States and the Pacific and we have the ability to translate our vast experience supporting environmental, conventional and chemical munitions response projects to providing seamless and comprehensive support and tailored solutions to meet customer needs.

PROFESSIONAL SERVICES

Representative Projects

Recovered Chemical Warfare Material Program (RCWM-P)

Role: Prime Contractor

Location: Various Locations, U.S.

Client: USACE, Omaha District

Contract Value: \$3M

Scope: Six task orders awarded to provide a variety of professional and technical services for the Office of the Deputy Assistant Secretary of the Army for Environment, Safety, and Occupational Health (DASA-ESOH) to support the Department of Defense (DoD) RCWM-P.

PROJECT HIGHLIGHTS

In 2014, GSI was awarded an initial task order to conduct an extensive review of the historical records of chemical warfare-related activities on Pueblo Chemical Depot which holds approximately 8% of the original U.S. chemical weapons stockpile. GSI's successful performance on this contract led to the award of an additional five (5) multi-year task orders valued at nearly \$3M to provide a wide variety of professional and technical services to support the RCWM-P.

8(a) Indefinite Delivery/Indefinite Quantity (IDIQ) Single Award Task Order Contract (SATOC) for Advisory and Assistance Services

Role: Prime Contractor

Location: Various Locations, U.S.

Client: USACE, Omaha District

Contract Value: \$9.9M

Scope: Provide a wide range of professional, scientific, and technical services to support work for the U.S. Army Corps of Engineers Omaha District, Northwestern Division.

PROJECT HIGHLIGHTS

Under this contract, GSI is providing opinions, special knowledge, or skills of subject matter experts to enhance the understanding of, and develop alternative solutions to complex issues; support and improve the operation of organizations; and provide outside points of view, advice and assistance for a broad area of interests including environmental restoration and compliance, resource conservation and climate change, environmental sustainability, strategic planning, asset management, logistical support and analysis, and financial analysis.

Defense Logistics Agency Support for Energy (DS-FE) Environmental Consulting Services for Environmental Restoration at Fort Belvoir, VA

Role: Prime Contractor

Location: Fort Belvoir, VA

Client: USACE, Omaha District

Contract Value: \$1.3M

Scope: Provide professional and technical services to support the DS-FE planning and programming process for DS-FE funded environmental restoration sites.

PROJECT HIGHLIGHTS

GSI is providing environmental consulting services to the DS-FE to assist with the planning and programming process for DS-FE funded environmental projects. Services include developing Restoration Strategy Workshop (RSW) materials and training, conducting RSW training events and meetings at up to 60 installations, working closely with DLA Program Managers and Leadership to identify and evaluate sites that are appropriate for Remedial Process Optimization, developing recommendations and closure timelines, and providing on-site Technical Restoration Support to DLA.
