INFORMATION TECHNOLOGY SERVICES

The GSI Family of Companies (GSI) provides tailored solutions for a wide range of Information Technology (IT) services for Department of Defense and Federal agencies. GSI employs a staff in seven offices across the Continental United States and the Pacific, allowing us to quickly assemble 8570.1 fully qualified, ACTCS register professionals to provide seamless and comprehensive support at any location. Our professionals include experienced Software Engineers, System Administrators, Analysts, and Technicians capable of providing a wide range of IT services from user experience (UX), mitigation steps and work arounds to providing full software development life cycle (SDLC) support, to include but not limited to network administration, email services, account management, SharePoint support, help desk and application management services. Our companies offer the best-in-class support by leveraging business best practices through PMI certified managers and ITIL-certified employees with 8570.1 certifications for IAM and IAT Level I-III-qualifications. GSI's national presence and depth of capabilities across multiple time zones provides clients with the experience and capability to meet challenging deadlines and complex project assignments with efficiency and accuracy.

INFORMATION TECHNOLOGIES

Representative Projects

Comprehensive Information Technology Services

Role: Prime Contractor

Location: Kamuela, Hawaii

Client: Environet Inc.

Contract Value: \$5.2M

Scope: Full-service IT system administrations services including 24-hour customer support and help desk support, systems software and hardware updates, designed and implemented data security technology, improved reliability and scalability, management of all operating systems, mobile telecommunications, video teleconferencing, Supply Systems Analysis.

PROJECT HIGHLIGHTS

In 2010, GSI was awarded a commercial contract to manage all IT services for Environet, a small business Federal contractor. Our client has project personnel across 10 time zones, relying on the functionality, security, and integrity of our provided services. GSI self-performed 100% of this contract. Over the course of the contract GSI's client increased both its revenue and employee count by over five times and increased its physical presence from one location to three. During this period GSI oversaw all Systems Administration duties.

8(a) Streamlined Technology Application Resource for Services (STARS) III

Role: Prime Contractor, SG Tech LLC.

Location: Various Locations, CONUS and OCONUS

Client: General Services Administration (GSA)

Total Contract Value: \$50B

Scope: 8(a) STARS III is a small business set-aside GWAC that provides flexible access to customized IT solutions from a large, diverse pool of 8(a) industry partners. This next-generation GWAC builds upon the framework of 8(a) STARS II and expands capabilities for emerging technologies and outside the continental United States (OCONUS) requirements.

PROJECT HIGHLIGHTS

GSA STARS III provides Federal agencies with fast access to custom IT solutions and allows sole source contracting. Sole source thresholds for non-DoD awards are \$25M; for DoD awards the sole source threshold is \$100M. Functional areas awarded to SG Tech on the STARS III contract include Information Technology Services and OCONUS Scope Sub-Areas. Services offered on this contract include data management, software development, systems design, information & communications technology, and cyber security.

SeaPort Next Generation (SeaPort NxG)

Role: Prime Contractor

Location: Various Locations, CONUS and OCONUS

Client: Navy Systems Commands, Office of Naval Research, Military Sealift Command, and U.S. Marine Corps

Total Contract Value: \$5B

Scope: The multiple-award, indefinite delivery, indefinite quantity (IDIQ) contract includes a five-year base period, furthers the Navy's objective to increase efficiency, and allows organizations to tailor requirements within a specific task order.

PROJECT HIGHLIGHTS

There are 23 functional areas including engineering support services and program management support services. SeaPort NxG marketplace provides end-to-end government to contractor support for the acquisition of services, from the definition of requirements to contract close-out, in a completely paperless and secure environment. Innovations of this contract include potential for a fifteen-year contract award, award term provisions, guaranteed savings clause, pass through escalation and profit on cost contracts caps, performance-based task orders, fully electronic task order process, and a strong focus on quality.
